

**Chandra X-ray Observatory**  
This observatory was sent into space and back soon after. Chandra observatory is going to observe the universe in a way that no other observatory has. It will look at X-rays and see things that no other observatory can see.

**Tissue Engineered**  
LARRY VILKOVICH, M.D., Ph.D., Director  
Artificial blood vessels are grown in a laboratory. They are grown in a petri dish similar to a petri dish. They are grown for use in the body for patients.
