

Jessica Watkins (Born May 14, 1988) is a NASA astronaut, geologist, aquanaut and former international rugby player. She is a member of the Artemis Team, a select group of astronauts charged with focusing on the development and training efforts for early missions to the Moon. Dr. Watkins earned a bachelor's degree in geological and environmental sciences at Stanford University, and then earned a Ph.D. in geology. She has worked at NASA's Ames Research Center and NASA's Jet Propulsion Laboratory, and was a science team collaborator for NASA's Mars Science Laboratory rover, Curiosity.
